A GOOD Thesis Defense presentation is:

- Focused - The topic should be narrow. You should only present ideas and only report on studies that are closely related to topic.
- Concise - Ideas should be presented economically. Don't take any more space than you need to present your ideas.
- Logical - The flow within and among slide should be a smooth, logical progression from one idea to the next.
- Integrative - Your presentation should stress how the ideas in the studies are related. Focus on the big picture. What commonalities do all the studies share?
- Current - Your presentation should focus on work being done on the cutting edge of your topic.

PRESENTATION STRUCTURE

- Introduction
- Literature Review
- Research Objectives
- Methodology
- Results
- Discussions
- Future Works
- Publications (if any)
- References

INTRODUCTION

Background of the proposed work and the motivation that led you to continue the study

- Research problem/question you investigated. State clearly the research problem you have addressed and what you have achieved.

LITERATURE REVIEW

- How did you conduct the literature review?
- Existing research works relevant to the proposed study as appropriate (Ex: in tabular form)
- Limitations/ research gaps identified in the literature review underlining the selected research gap for your study

RESEARCH OBJECTIVES

- Overall research objectives with specific objectives

METHODOLOGY

Describes your approach, and where applicable and appropriate to discipline includes the design, sample, data collection, procedure and approach to data analysis.

- Proposed method and significance of the proposed method

OBSERVATIONS AND/OR RESULTS

Discuss the results of your research. Describe the results clearly. Use graphs, tables, and charts to help clarify the results.

ORGANIZING - SLIDES

- Use slide 1 to show the Title of the research, Department name, student name, student index number and supervisor name.
- In the next slide show the agenda
- Less text and more graphics, Text in dark colors and background in light colors
- Choose the right font size.
- Slide numbers are important.
- Raise your voice as needed.
- Eye contact and gesture should be managed accordingly.
- Brief introduction, only highlighting your message.
- Next clearly explain your system by a statement.

TIMING OF ORAL PRESENTATION

- 12 minutes to Present.
- 3 minutes for Q & A Session.
- First Bell will Ring in 10 Minutes.
- Second bell will ring in 12 Minutes.
- Student will be forced to stop the presentation at 12 minutes.

PRESENTATION SUBMISSION

- It is required to submit presentation slides on or before **18th of April 2025 at 11.59 p.m.** via provided link, renamed with your index no.

SELF RECORDED VIDEO

- You need to prepare Self Recorded Presentation Video of a maximum of 10 MB, and during the presentation candidate's face should appear in the recorded video.
- You need to upload the video, renamed with your index no. to the provided link on or before **18th**

of April 2025 at 11.59 p.m.

SUBMIT A CORRECTED ABSTRACT

- You need to submit a corrected (by Supervisor) abstract renamed with your index no. to the provided upload link on or before **18th of April 2025 at 11.59 p.m..**
- Make sure you are attaching the signed consent form along with the abstract renamed with your index no.
- Upload link will be available in LMS.

DRESS CODE

- Students should follow the following Dress Code During the final presentation defense day.
 - If you are Male, wearing formal dress, mostly light color shirt, fully shaved, hair should be properly cut. (Attending an interview)
 - If you are Female, wearing a Skirt and Blouse (mostly light color). A full-coverage blouse or a collared shirt is all acceptable.
- We will be maintaining the standard; the panel will not encourage anybody to violate such rules to face the defense.
